Herndon, Virginia 20171

## Christopher E. Pogue

Chris Pogue is the Senior Vice President of Nuix's Cyber Threat Analysis security consulting team, and a member of the US Secret Service Electronic Crimes Task Force.

Chris is responsible for the company's security services organisation; he oversees critical investigations and contracts, and key markets throughout the United States. His team focuses on incident response, breach preparedness, penetration testing and malware reverse engineering.

Over his career, Chris has led multiple professional security services organisations and corporate security initiatives to investigate thousands of security breaches worldwide. His extensive experience is drawn from careers as a cybercrimes investigator, ethical hacker, military officer and law enforcement and military instructor.

In 2010, Chris was named a SANS Thought Leader.

Chris served in the United States Army as a Signal Corps Warrant Officer and Field Artillery Sergeant. He distinguished himself as an Honour Graduate from a variety of Army Academies and Schools and received multiple awards and commendations for excellence.

## PROFESSIONAL MEMBERSHIPS

- Computer Security Institute
- Electronic Commerce Council
- US Army Warrant Officer Association
- High Tech Crime Investigators Association
- Consortium of Digital Forensic Specialists
- US Secret Service, Electronic Crimes Task Force (various field offices)
- International Association of Chiefs of Police
- International Association of Financial Crimes Investigators

## PRESENTATIONS

Chris regularly speaks at conferences including SecTor, Security Summit at Langley Research Centre, Merchant Risk Council, U.S. Cybercrime Conference, International Association of Financial Crimes Investigators, Canadian Information Security Officers Summit, International Association of Chiefs of Police, International Association of Law Enforcement Executives, Digital Crimes Consortium, MasterCard Academy of Risk and VISA PCI Security Panel.

## ABOUT THE NUIX CYBER THREAT ANALYSIS TEAM

Nuix's Cyber Threat Analysis Team provides a comprehensive suite of professional security services including malware analysis, advanced threat emulation, penetration testing, secure code review, product certification, digital forensics and incident response. Its services include:

- **Digital forensics and incident response** services that respond quickly and find relevant, accurate results. Our tactical teams apply their knowledge and experience across the entire breach cycle, including pre-breach incident response plan development, evidence collection, post-investigation consulting, malware reverse engineering and threat intelligence.
- **Malware reverse engineering** to analyse one-off files or provide an ongoing service for organisations that lack in-house expertise.
- An **Advanced Threats and Countermeasures** team that combines penetration testing and incident response, actively simulating attacks to explore the potential real-world impacts. We give you an attacker's viewpoint to provide the leverage you need to boost your defences and the knowledge to catch attacks as they happen.
- **Services on retainer** for organisations that need continuous testing, on-demand incident response and multi-sample malware analysis to supplement existing organisational security capabilities.
- **Custom training** solutions that help organisations reach the next level of maturity in their security.
